HONGHONG, JANUARY 22ND, 1894. An extraordinary general meeting of the Victoria Recreation Club has been convened for the purpose of reconsidering and revising the present rules relating to ballot. The matter is one of some public interest, the Japan, 1876, Japan Supplementary, United Club having hitherto been regarded as a public rather than a private institution. The proposal to be submitted to the members on Friday is to alter its charfacter in this respect and make admission dependent on as strict a ballot as that obtaining in the Hougkoug Club. some years past there has been a growof H.B.M. At the same time it must be admitted that an institution designed to meet the requirements of a small civilian population might not be equal to the accommodation of all the men of a large garrison who might wish to join it. But the present agitation is directed not only against the admission of the military but against the 6 p.m. democratic principles on which the Clubhas hitherto been conducted. At all events the Club was started on as democratic a basis was compatible with its management as a Club, it being provided in the rules members as a matter of course unless special requisition for a ballot was made. The provision as to a ballot has always been understood to be designed solely with the objectionable character, and during

But, granting the reasonableness of their objections, the question erises whether it would not be more in accordance with justice for these men to form new clubs at their own expense rather than to attempt to raise the social standard of the Recreation more of those whom they regard as be longing to a lower class than themselves, the new Gaol extension ground. Any one would prefer to have a prisate park to take his recreation in than to have justification for an individual or group of inpublic at large. The case of the Victoria Recreation Club is unalogous. Whether or not, it was intended originally that the institution should be as democratic as has become, it has existed now for twentyone years under its present constitution, and its appropriation at this time of day small coterie should not be permit ted! It is possible the proposed change may command a majority of the votes of the members, who, already enjoying the privileges of the Club themselves, may ba indifferent to or oblivious of the interests | of others belonging to their own social grade who may hereafter seek admission and be excluded. But before many years the Club special commission to examine into the condition will have to leave its 'present' premises and will again be an applicant for fayours from the Government. When that time arrives i is to be hoped the Government will take the same view that was taken by Sir Ammur KENNEDY and will refuse to allow the use China, Japan, &c. 5. W. A. Dulf ( Suretary.) The CHAIRMAN said Gentlemen, the repor of the directors was issued on the 18th instant, and unless you wish otherwise I will take it as read, I think, gentlemen, it will not be too much to say that this is the last, unfavourable report you will have presented to you. It is with great regret your directors have to meet you on this occasion with accounts that show a loss, but that loss would not have occurred if it had not bean abligatory upon us to write off as bad dobts a large postion of what were taken over by the present Company as good assets from the old one. The directors have no wish to impaga the good faith of our late Secretary in presenting a list of these assets, in the form of "Accounts Receivable." duly aftested by himself, to the directors and auditors; but if we had been fully aware of oircomstances that came to our knowledge later. during the above of the Sicretary on leave, we should never have allowed many of the accounts to appear to that list: The fact is, gentlemon the late Secretary, whi at fulfilling all that could baye been their it as manager of the works and machinery, avas not equal to his elerical duties in the office, and in the case of several disputed. amounts, which he probably imagined he could recever, the Company found itself without a leg to stand on when pryment was resisted. The difficulty in a small, struggling off up iso like ours has been to find a decent degree of efficiency in two different departments, works and office, combined in one individual. It has never been within our means to employ a skilled man for each, but I am happy to say we have now made arrangements whereby a recurrence of what has taken place becomes impossible, and that without materially increasing expenses. The works have book kopt up in a very efficient state, and many improvements made which have. been paid for out of income. The typhoon in October last oursed us a let of damage in various ways, the notual loss of goods in process of manufacture being \$1,103. It has HONGKONG CORINTHIAN SAILING been necessary to raise the height of the floor of the large sheds, and tile the same, to put out goods during the drying process above the reach of floods which occasionally, for years past, Again the Corinthians were favoured with a have been the moans of serious losses. The we hope that in future our drains will be capable of carrying off all flood waters. A tramway has been laid from the kilns to the wherf to supersode the laborious and costly method of conveying goods to the brats by hand barrows. New matshads have been built in place of old ones carried away in the typhoons, and the whart has been practically reconstructed for the greater

part of its length. All this work has been carried out by our new Secretary and Manager, Mr. buoy off Kowloon Docks, No. 2 Cosmopolitan W. A. Duff, ably seconded by, Mr. Watte, the foreman at the works, to both of whom our best thanks are due for the r unremitting exertions in the Company's intrests, With repard to he sales of the Lompany's products, after declining to a very low ob period from November, 1892, to M'y, 1893, they afterwards largely increased, the average of the latter five months of the year being double that of the previous seven months, while I am November (after the accounts now before you were closed) were more than double, those of the are full of orders that will keep the Company in we have had to decline orders that required to be delivered within that period. I may mention that the "rejects" amount to less than 21 per cent. which under

the stringent tests imposed is very satisfactory. Our firebricks have been greatly improved, and an unsolicited testimonial from our largest customer has been intely received. What I have stated, gentlemen, are to eacts upon which your directors base the hope and expectation conveyed in my opening words.—that this may be the last un avourable report you will receive from them. We have worked assiduously for seven years in the face of almost overwhelming difficulties. but we think the Company is now secure and on the eve of taking a place among the dividendsaying industries of the Colony.

There being no questions, the CHAIRMAN noved the adoption of the report, and accounts. Mr. W. H. RAY seconded Carried unanimously. On the motion of Mr. DANBY, seconded by Mr. JORDAN, the appointment of Mr. Humphreys as
